

COMMITTED TO

Adding value

THE DATA GROUP INCOME FUND

QUARTER TWO – ENDED JUNE 30, 2007

Q2

COMMITTED TO

Our values

The DATA Group of Companies has evolved a deeply rooted, widely recognized way of doing business. Our success owes much to a set of corporate values, which have helped to define our culture.

WE ARE committed to customer service and quality.

WE DO what we say we will do.

WE CONDUCT our business ethically and legally.

WE ARE a people-oriented company committed to safety and the environment.

WE WILL develop, adapt, and use technology for our customers' benefit.

WE STRIVE for market leadership and take pride in our products and services.

WE ENCOURAGE decision-making and initiative at all levels of our Company.

LETTER TO UNITHOLDERS

I am pleased to provide our Unitholders with our 2007 Second Quarter report on the results of our operations and related distributions.

Revenue for the quarter ended June 30, 2007 was \$97.2 million, an increase of 80.7% compared to the same period in 2006. Net loss for the second quarter was \$8.5 million or \$0.36 per basic unit. During the quarter, a non-cash charge relating to future income taxes of \$9.7 million was recognized as a result of the enactment of tax laws (the "SIFT rules") which will, generally, impose tax on income trusts beginning in 2011. In addition, in the second quarter of 2007 we expensed \$2.4 million in costs in connection with the closure of DATA facilities related to the integration of the Relizon Canada business.

EBITDA (earnings before interest, taxes, depreciation and amortization) in the quarter was \$7.4 million or 7.6% of revenue compared to \$6.4 million or 11.9% of revenue in the same period of 2006. The decrease in EBITDA margins (from 11.9% to 7.6%) was as expected as historical margins in the Relizon Canada business were less than those in DATA and the Fund expensed \$2.4 million for integration.

I am very pleased with our progress to date in the integration of our Relizon Canada acquisition. Our team is ahead of schedule and as a result, as previously mentioned, we expensed \$2.4 million in the quarter related to the integration.

We now believe that we will achieve synergies of \$1.0 million to \$3.0 million greater than our original objective of achieving \$7.0 million per annum in pre-tax operating and other synergies and costs savings. Our team has done an excellent job of bringing this critical initiative together.

The DATA Group's objective continues to be to provide Unitholders with steady, dependable and growing distributions. In our second quarter of 2007, the Fund had total cash available for distribution of \$4.4 million or \$0.19 per unit. Our total distributions to Unitholders were \$6.8 million or \$0.290 per unit for a payout ratio of 156.2%. Adjusting for the \$2.4 million of integration costs and \$1.0 million in related maintenance capital expenditures incurred in the quarter would increase cash available for distribution in excess of actual distributions by \$0.9 million and reduce the payout ratio to 88.1%.

In closing, we want to thank our Unitholders for their continuing faith in us. We are most thankful for the ongoing support of our customers and the pride and dedication of our employees.

August 10, 2007

The DATA Group Income Fund

David M. Odell

President and Chief Executive Officer

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis ("MD&A") for the six months ended June 30, 2007 should be read in conjunction with the MD&A of The DATA Group Income Fund (the "Fund") for the year ended December 31, 2006 and the unaudited interim financial statements of the Fund for the three and six months ended June 30, 2007. These documents are available on the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com. External economic and industry factors remain substantially unchanged from those described in the Fund's 2006 annual MD&A, unless otherwise stated.

The Fund owns directly and indirectly all of the outstanding partnership units of The Data Group Limited Partnership (the "Data Group") and all the outstanding shares of the Data Group's general partner, Data Business Forms Limited ("DBFL").

The Data Group is a leading provider of total document management solutions, including printed products, and operates as three divisions. DATA East and West (which provided approximately 88% of total revenue for the first six months of 2007) sells a broad range of printed products and document management services directly to end users. Sundog (which provided approximately 7% of total revenue for the first six months of 2007) is a commercial printer specializing in the production of high-quality annual reports, marketing materials and event tickets. Multiple Pakfold (which provided approximately 5% of total revenue for the first six months of 2007) sells forms and labels to independent brokers and resellers.

All financial information in this MD&A is presented in Canadian dollars and in accordance with Canadian generally accepted accounting principles ("GAAP"), unless specified otherwise.

The date of this MD&A is August 10, 2007. Additional information relating to the Fund, including the Fund's most recently filed Annual Information Form and Management Proxy Circular, is available on SEDAR.

FORWARD-LOOKING STATEMENTS

Certain statements in this MD&A constitute "forward-looking" statements that involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance, objectives or achievements of the Fund, DBFL and/or its successor, the Data Group, or industry results to be materially different from any future results, performance, objectives or achievements expressed or implied by such forward-looking statements. When used in this MD&A, the words such as "may", "would", "could", "will", "expect", "anticipate", "estimate", "believe", "intend", "plan", and other similar expressions are intended to identify forward-looking statements. These statements reflect the Fund's current views regarding future events and operating performance, are based on information currently available to the Fund, and speak only as of the date of this MD&A. These forward-looking statements involve a number of risks, uncertainties and assumptions and should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such performance or results will be achieved. Many factors could cause the actual results, performance or achievements of the Fund and the Data Group to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. The principal assumptions that the Fund made in the preparation of these forward-looking statements include the ability of management to achieve approximately \$8.0 million to \$10.0 million per annum in pre-tax operating and

other synergies and cost savings, and other benefits expected to be realized, and the timing and net present value thereof, based on the achievement of operational efficiencies from restructuring, integration and other initiatives relating to the combination of the respective businesses previously carried on by DBFL and Relizon Canada Inc. ("Relizon Canada"); the completion of the proposed sale and leaseback by the Data Group of its Brockville, Ontario facility substantially upon the terms and conditions contained in the offer to purchase described under "Recent Developments – Proposed Disposition of Brockville, Ontario Facility"; the accuracy of estimated synergies in respect of expected cash flows, cost savings and profitability from the combination of the DBFL and Relizon Canada businesses; the risk that the DBFL and Relizon Canada businesses will not be integrated successfully; the risk that any savings, growth prospects or other synergies from the combination of those businesses will not be fully realized or will take longer to realize than expected; competition from competitors supplying similar products and services; the Data Group's ability to grow its sales or even maintain historical levels of its sales of printed business documents; increases in the costs of paper and other raw materials used by the Data Group; the Data Group's ability to maintain relationships with its customers; and the implementation of proposed changes to the income tax treatment of certain income trusts, such as the Fund, which will, if implemented in their current form, subject the Fund to tax commencing in 2011 and the effect of those proposed changes on the trading price of the Fund's units. Additional factors are discussed under the heading "Risks and Uncertainties" in this MD&A and in the Fund's other publicly available disclosure documents, as filed by the Fund on SEDAR (www.sedar.com). Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in this MD&A as intended, planned, anticipated, believed, estimated or expected. Unless required by applicable securities law, the Fund does not intend, and does not assume any obligation, to update these forward-looking statements.

NON-GAAP MEASURES

This MD&A includes certain non-GAAP measures as supplementary information. When used in this MD&A, ("EBITDA") means earnings before interest, taxes, depreciation and amortization, and ("Adjusted EBITDA") means EBITDA adjusted for non-cash inventory fair value allocation charges. Management believes that, in addition to net income, EBITDA is a useful supplemental measure in evaluating the performance of the Data Group and/or the Fund. Cash available for distribution (or distributable cash) means cash provided by (used in) operating activities increased by, or reduced for, non-cash interest expense, maintenance capital expenditures, changes in non-cash working capital, partnership conversion costs and cash income taxes. Specifically, management views cash available for distribution as a measure generally used by Canadian income funds, investors and management as an indicator of financial performance. EBITDA, Adjusted EBITDA and cash available for distribution are not earnings or cash flow measures recognized by GAAP and do not have any standardized meanings prescribed by GAAP. Therefore, EBITDA, Adjusted EBITDA and cash available for distribution are unlikely to be comparable to similar measures presented by other issuers.

Investors are cautioned that EBITDA and Adjusted EBITDA should not be construed as an alternative to net income or loss determined in accordance with GAAP as indicators of the Data Group's or the Fund's performance and investors are cautioned that cash available for distribution (distributable cash) is not an alternative to cash flows from operating, investing and financing activities determined in accordance with GAAP as measures of liquidity and cash flows. For a reconciliation of cash provided by (used in) operating activities to cash available for distribution, see Table 3 below.

RECENT DEVELOPMENTS

PROPOSED SALE AND LEASEBACK OF BROCKVILLE, ONTARIO FACILITY

On July 13, 2007, the Fund announced that the Data Group agreed to sell its Brockville, Ontario printing facility to Capital Wapiti Inc. ("Capital Wapiti"). The Data Group and Capital Wapiti have entered into an offer to purchase pursuant to which the Data Group has agreed to sell its Brockville, Ontario facility to Capital Wapiti for a purchase price of approximately \$4.5 million, subject to customary adjustments. Upon closing of sale and purchase of the facility, the Data Group and Capital Wapiti intend to enter into a lease pursuant to which Capital Wapiti will lease back to the Data Group the Brockville, Ontario facility. The term of the lease will be 10 years and the Data Group will have the option to renew the lease for an additional term of five years upon not less than 12 months' prior notice to Capital Wapiti. The net rent payable by the Data Group under the proposed lease is expected to be \$374,536 per year for the first five years, \$421,353 per year during the following five year period, and \$468,170 per year during the five year renewal period, if applicable. Completion of this transaction is subject to several conditions, including the ability of Capital Wapiti to obtain necessary regulatory approval for the purchase of the Brockville, Ontario facility and to raise sufficient financing to fund the purchase price payable to the Data Group, and the mutual agreement of the parties to the terms of the proposed lease between them. The Offer will terminate if the sale of the Brockville, Ontario facility has not been completed by September 15, 2007, unless the parties otherwise agree.

RELIZON CANADA ACQUISITION

On August 31, 2006, the Fund acquired from The Relizon Company (the "Relizon Canada Acquisition") all of the shares of Relizon Canada for a purchase price (the "Purchase Price") of \$141.0 million, subject to a working capital adjustment. The Purchase Price consisted of a cash payment of \$112.0 million and 2,964,326 trust units of the Fund. The Purchase Price was adjusted down by \$1.0 million based on the closing calculation of the working capital of Relizon Canada. Immediately following the Relizon Canada Acquisition, Relizon Canada and Data Business Forms Limited (a predecessor to the Data Group) were amalgamated and continued as "Data Business Forms Limited" prior to the reorganization of the Fund on September 30, 2006. See –"Reorganization" below.

At the time of the Relizon Canada Acquisition, Relizon Canada was a provider of document outsourcing solutions in Canada, helping organizations improve the efficiency and effectiveness of their printed and electronic communications, both internally with employees, and externally with customers, vendors and prospects. At the time of the Relizon Canada Acquisition, Relizon Canada had approximately 1,000 employees and operated five manufacturing facilities, four business service centres, one warehouse and distribution centre and 27 sales offices across Canada.

The Relizon Canada Acquisition was consistent with the Fund's acquisition strategy to identify consolidation opportunities within its existing core business segments and acquire strong companies with complementary strengths and significant opportunities to achieve meaningful synergies. Corporate synergies are expected to consist primarily of cost savings relating to reduction of overhead and support services. This strategy is intended to assist the Fund in achieving its objective of generating stable and growing cash available for distribution.

Paralleling the success of DBFL, the Relizon Canada business had also maintained long-term relationships with the majority of its largest customers for more than 10 years. Management believes that this evidences the commitment of both businesses to meeting and exceeding the expectations of clients and demonstrates the alignment between each businesses' fundamental approach to its markets, operating styles and values. At the time of the Relizon Canada Acquisition, both the Relizon Canada business and the DBFL business operated primarily within the same market segments. However, each business enjoyed both regional strengths and specialty product capabilities which complement the other and can be better leveraged as a combined business. In addition, further diversification of products and customer base is expected to mitigate the risk associated with a shift in demand from any one customer or industry, or with potential market shifts in demand for any one product or service. Management believes that the Relizon Canada Acquisition creates significant opportunities to achieve meaningful cost synergies and has identified the potential to realize annual pre-tax operating and corporate synergies of approximately \$8.0 million to \$10.0 million. These savings are expected to be fully realized by approximately the third quarter of 2008. Operating synergies are expected to consist primarily of cost savings related to cost improvements from more efficient operations as a result of facilities integration and improved asset utilization, streamlined procurement practices and economies of scale; reduced maintenance capital expenditure requirements; and reduced sales and marketing expenses. On March 1, 2007, the Fund announced a restructuring plan in connection with the integration of the DBFL and Relizon Canada businesses, which includes a reduction in the acquired business' and Data Group's workforces, the relocation of certain employees to other Data Group facilities and the closure of four plants. See "Outlook". As at June 30, 2007, management had accrued \$10.4 million of restructuring costs, less payments made to that date, estimated to be incurred in restructuring Relizon Canada's business. However, the amount of these restructuring costs is subject to modification as management completes a detailed assessment of the assets acquired and liabilities assumed pursuant to the Relizon Canada Acquisition and changes may be made as more information becomes available.

The cash portion of the Purchase Price was funded with a combination of funds raised pursuant to a public offering of securities of the Fund, additional borrowings under the Data Group's credit facilities, and cash on hand. In connection with the Relizon Canada Acquisition, the Fund issued to the public (the "Offering") 5,650,000 subscription receipts (the "Subscription Receipts") at a price of \$9.50 per subscription receipt, each representing the right to receive one Unit of the Fund (a "Unit") for no additional consideration upon completion of the Relizon Canada Acquisition, for gross proceeds of approximately \$53.7 million, and \$35.0 million aggregate principal amount of 6.75% extendible convertible unsecured subordinated debentures (the "Convertible Debentures"). Following the closing of the Relizon Canada Acquisition, the Fund issued 5,650,000 Units upon the exchange of the Subscription Receipts. The net proceeds of the Offering were approximately \$84.6 million and were used to fund \$82.0 million of the cash portion of the Purchase Price. The remainder of the cash portion of the Purchase Price was funded through existing cash balances and committed credit facilities provided by two Canadian chartered banks. For a description of the Convertible Debentures, please refer to the Fund's 2006 annual MD&A and the Fund's short form prospectus dated August 24, 2006, each of which is available on SEDAR.

REORGANIZATION

On September 30, 2006, the Fund reorganized its structure to carry on in a limited partnership (being the Data Group) the business previously carried on by DBFL (including the Relizon Canada business) (the "Reorganization"). In connection with the Reorganization, DBFL became the general partner of the Data Partnership. The purpose of the Reorganization was to establish a "flow-through" organizational structure which will enable the Fund to maximize cash available for distribution and provide a more flexible legal and operating structure, including future expansion opportunities. In light of the enactment of the SIFT rules, this flow-through structure will effectively end by 2011. The Reorganization was effected by way of a plan of arrangement following receipt by the Fund of an advance income tax ruling from the Canada Revenue Agency, approval by the Fund's Unitholders and applicable court and regulatory approvals. The Reorganization did not result in a change to the number, type or ownership of the outstanding units of the Fund and had no impact on the daily operations of the Fund. As part of the Reorganization, certain consequential amendments were made to the Fund's Declaration of Trust. A detailed description of the Reorganization is contained in the Fund's management information circular dated August 28, 2006, which is available on SEDAR.

GENERAL INFORMATION AND RESULTS OF OPERATIONS

Table 1 The following table sets out selected historical financial information for the periods noted.

The period from January 1, 2007 to June 30, 2007 includes the results of operations of the Relizon Canada business.

RESULTS OF OPERATIONS

THE DATA GROUP INCOME FUND

OVERVIEW

On August 31, 2006, the Fund completed the Relizon Canada Acquisition. At the time of the Relizon Canada Acquisition, both Relizon Canada and DBFL operated primarily within the same market segments. Since the date of the Relizon Canada Acquisition, the Data Group has been engaged in the integration of the former Relizon Canada and DBFL businesses, with a view to achieving operating and corporate synergies through the combination of those businesses. On March 1, 2007, the Fund announced a restructuring plan designed to realize on those synergies. See "Outlook". The following discussion and analysis includes the results of operations of the former Relizon Canada business for the quarter and six months ended June 30, 2007. Those operations now form part of the Data Group's DATA East and West division and represent the principal reason for changes in the Fund's results of operations in 2007 compared to 2006.

REVENUES

For the quarter ended June 30, 2007, the Fund recorded revenues of \$97.2 million, an increase of 80.7% or \$43.4 million compared with the same period in 2006. The revenue increase, before intersegment revenues, was substantially the result of a \$45.6 million increase in the DATA East and West segment resulting from the acquisition of Relizon Canada. The increase in DATA East and West was partially offset by declines of \$0.3 million and \$1.3 million in the Sundog and Multiple Pakfold segments, respectively. For the six months ended June 30, 2007, the Fund recorded revenues of \$201.2 million, an increase of \$91.2 million or 83.0% compared with the same period in 2006. The increase, before intersegment revenues, is the net result of a \$95.2 million increase in the DATA East and West segment, a \$0.9 million decrease in the Sundog segment and a \$2.2 million decrease in the Multiple Pakfold segment. A more detailed discussion of the results of operations of each of the Fund's reporting segments is set out below.

COST OF REVENUES AND GROSS PROFIT

For the quarter ended June 30, 2007, cost of revenues increased to \$71.8 million from \$38.3 million for the same period in 2006. The increase was a result of a \$35.0 million increase in the DATA East and West segment resulting substantially from the acquisition of Relizon Canada. This resulted in a gross profit in the second quarter of 2007 of \$25.4 million, which represented an increase of \$9.9 million or 63.7% from \$15.5 million in the second quarter of 2006. The increase in gross profit was attributable to a \$11.4 million increase in the DATA East and West segment resulting substantially from the acquisition of Relizon Canada. As a percentage of revenue the gross profit decreased to 26.1% from 28.8% in the same period in 2006 due to lower margins in the Relizon Canada business. For the six months ended June 30, 2007, cost of revenues increased from \$77.9 million for the same period in 2006 to \$148.2 million in 2007. This resulted in a gross profit for the six months ended June 30, 2007 of \$53.0 million, which represented an increase of \$20.9 million or 65.1% from \$32.1 million in the same period of 2006. As a percentage of revenue, gross profit decreased for the six months ended June 30, 2007 to 26.3% from 29.2%.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES AND INTEGRATION COSTS

Selling, general and administrative ("SG&A") expenses, including administrative expenses of the Fund, for the quarter ended June 30, 2007 were \$17.8 million as compared to \$9.9 million in the same period of 2006. SG&A expenses for the second quarter of 2007 were higher due to costs incurred in connection with the acquisition of the Relizon Canada business and the related integration expenses. In the second quarter of 2007, the Data

Group incurred \$2.4 million of costs related to the integration of the DBFL and Relizon Canada businesses, which primarily consisted of severance and moving expenses. SG&A expenses for the six months ended June 30, 2007 were \$36.6 million as compared to \$20.4 million in the same period of 2006. Excluding the expenses incurred by the operations of the Relizon Canada business, SG&A expenses for the six months ended June 30, 2007 were higher due to costs incurred in connection with the acquisition of the Relizon Canada business and the related integration expenses. In the six months ended June 30, 2007 the Data Group incurred \$3.4 million of costs related to the integration of the DBFL and Relizon Canada businesses, which primarily consisted of severance and moving expenses.

ADJUSTED EBITDA

For the quarter ended June 30, 2007, Adjusted EBITDA was \$7.4 million, or 7.6% of revenue. Adjusted EBITDA margin for the quarter ended June 30, 2007, increased \$1.0 million or 15.1% from the same period in the prior year and the Adjusted EBITDA margin for the quarter, as a percentage of revenue, decreased from 11.9% of revenue in 2006 to 7.6% of revenue in 2007. Adjusted EBITDA for the six months ended June 30, 2007 was \$17.4 million or 8.6%. As compared to the same period in 2006, Adjusted EBITDA for the six months ended June 30, 2007 increased \$4.1 million or 30.7% from the same period in the prior year and the Adjusted EBITDA margin for the six month period, as a percentage of revenue, decreased from 12.1% of revenue in 2006 to 8.6% of revenue in 2007. The decrease as a percentage of revenue was substantially attributable to the costs incurred in the integration of the DBFL and Relizon Canada businesses. The Adjusted EBITDA margin would have been 10.0% without these integration costs, and the remainder of the decline was attributable to reduced margins in the DATA East and West segment and the gross margin reductions in the Sundog and Multiple Pakfold segments as discussed below.

INTEREST EXPENSE

Net interest expense on long-term debt relating to the Data Group's credit facilities and the Fund's \$35.0 million aggregate principal amount of outstanding convertible debentures (the "Convertible Debentures") was \$1.6 million for the quarter ended June 30, 2007 compared to \$0.6 million for the same period in 2006. Net interest expense was \$3.1 million for the six months ended June 30, 2007 compared to \$1.1 million for the same period in 2006. Net interest expense increased due to the additional interest expense on the \$30.0 million drawn under the Data Group's credit facilities and the issuance of the Convertible Debentures, in each case to fund the Relizon Canada Acquisition.

Interest income of \$0.1 million and \$0.2 million earned during the three and six month periods ended June 30, 2007, respectively, were consistent with the applicable prior periods. This interest income was substantially related to the cash and cash equivalents held by the Data Group.

INCOME TAXES

On June 22, 2007, Bill C-52, which contained the SIFT rules, became law. As a result, under Canadian GAAP, the Fund commenced accounting for tax changes in its June 30, 2007 interim reporting. A net long term future income tax liability of \$9.3 million was recognized with a corresponding amount of \$9.7 million flowing through the Fund's income for the quarter ended June 30, 2007. The future income tax liability represents estimated temporary differences at June 30, 2007 that are expected to reverse starting in fiscal year 2011. Future income tax liabilities and assets will be assessed each quarter and any changes will be recognized on the Fund's consolidated statement of operations.

NET (LOSS) INCOME

Net loss for the quarter ended June 30, 2007 was \$8.5 million compared to net income of \$4.3 million for the quarter ended June 30, 2006. Net loss for the six months ended June 30, 2007 was \$4.7 million compared to net income of \$8.3 million for the six months ended June 30, 2006. The decrease in comparable profitability was due to the provision for future income taxes and the factors discussed above.

DATA EAST AND WEST

This segment includes the operations of the Relizon Canada business. In the three months ended June 30, 2007 revenue at the Data Group's DATA East and West segment increased \$45.6 million or 108.6% to \$87.6 million from \$42.0 million for the same period in the prior year. Revenue for the six months ended June 30, 2007 increased \$95.2 million or 111.2% to \$180.9 million from \$85.7 million for the same period in the prior year.

The increase in revenue in the quarter was due to a number of factors. The principal factor for the increase was the acquisition of Relizon Canada on August 31, 2006. The other factors which affected revenue for the second quarter of 2007 were increased sales of labels, form label combinations and laser cut sheets, offset by declines in traditional business forms.

Gross profit in the quarter ended June 30, 2007 increased \$10.6 million to \$22.8 million from \$12.2 million in the same period of 2006. The gross profit as a percentage of revenue declined to 26.0% from 28.9% for the same period in 2006. The decline in gross profit percentage was due to lower margins in the Relizon Canada business compared to those realized in the former DBFL business. For the six months ending June 30, 2007 gross profit increased \$22.1 million to \$47.0 million from \$24.9 million in the same period of 2006. The gross profit as a percentage of revenue declined to 26.0% from 29.1% for the same period in 2006. The decline in gross profit percentage was due to lower margins in the Relizon Canada business compared to those realized in the former DBFL business. Gross profit margins of the combined businesses are expected to improve as the plant restructurings and other integration initiatives related to the Relizon Canada Acquisition are completed.

As part of the Fund's restructuring plan announced on March 1, 2007, the Fund has closed three of its plants located in Hemmingford, Quebec; Orangeville, Ontario; and Medicine Hat, Alberta. The movement of the equipment from these plants to other Data Group facilities caused minor interruptions in production during the quarter. The movements were executed as planned with no adverse effects to consumer relationships. These plant closures are expected to reduce excess production capacity within the DATA East and West division following the combination of the former Relizon Canada and DBFL businesses. See "Outlook".

SUNDOG

Revenues at the Data Group's Sundog division declined \$0.3 million from \$7.1 million in the second quarter of 2006 to \$6.7 million in 2007. Revenue for the six months ending June 30, 2007 decreased \$0.9 million or 6.1% to \$13.6 million from \$14.5 million for the same period in the prior year. The decrease in revenue was due to a general softness for commercial printing in the Alberta market in the second quarter of 2007. In addition, Sundog is experiencing some increased competitive pressure in Western Canada.

For the quarter ended June 30, 2007, gross profit decreased 7.1% to \$2.3 million from \$2.5 million in 2006. Gross profit as a percentage of revenue decreased to 34.1% from 34.9% in the comparable period of 2006. For the six months ended June 30, 2007, gross profit decreased \$0.4 million to \$4.8 million from \$5.2 million in the

same period of 2006. The gross profit margin was 34.9% compared to 35.6% for the same period in 2006. The decline in gross profit was due to the reasons outlined above with respect to the decrease in revenue, which resulted in lower press utilization.

MULTIPLE PAKFOLD

Revenue at the Data Group's Multiple Pakfold division decreased \$1.3 million to \$4.2 million in the second quarter of 2007 from \$5.5 million in the same period of 2006. Revenue for the six months ended June 30, 2007 decreased \$2.2 million or 18.4% to \$9.6 million from \$11.7 million for the same period in the prior year.

On March 1, 2007, the Data Group announced the closure of the Dorval facility as part of its restructuring plan. The decrease in revenue in the quarter was due to disruption in operations as the production at the Data Group's Dorval facility was moved to the Mississauga facility. In addition, the segment continues to experience sales declines in traditional business forms.

For the quarter ended June 30, 2007, gross profit decreased by \$0.5 million to \$0.3 million from the same period in 2006. The gross profit margin was 8.0% compared to 16.0% for the same period in 2006. For the six months ended June 30, 2007, gross profit decreased \$0.8 million to \$1.2 million from \$2.0 million in the same period of 2006. The gross profit margin was 12.6% compared to 17.2% for the same period in 2006. In each case, the decline was due to the reasons stated above.

CASH AVAILABLE FOR DISTRIBUTION

For the quarter ended June 30, 2007, the Fund generated \$4.4 million or \$0.186 per unit of cash available for distribution compared to \$5.1 million or \$0.343 per unit for the same period in the prior year. Cash available for distribution for the three months ended June 30, 2007 was calculated by deducting the changes in non-cash working capital of \$3.2 million and maintenance capital expenditures of \$1.6 million from cash provided by operating activities of \$9.1 million. If the integration costs of \$2.4 million and the capital expenditures of \$1.0 million related to the integration and incurred during the quarter were excluded, cash available for distribution would have been \$7.7 million or \$0.329 per unit. For the six months ended June 30, 2007, the Fund generated \$11.7 million or \$0.499 per unit of cash available for distribution compared to \$10.8 million or \$0.730 per unit in the prior year. Cash available for distribution for the six months ended June 30, 2007 was calculated by adding the changes in non-cash working capital of \$1.7 million and deducting the maintenance capital expenditures of \$2.8 million from cash provided by operating activities of \$12.6 million. If the integration costs of \$3.4 million and the capital expenditures of \$1.0 million related to the integration and incurred in the six months ended June 30, 2007 were excluded, cash available for distribution would have been \$16.1 million or \$0.687 per unit. See Table 3 below for a breakdown of these figures for the periods from January 1, 2007 to June 30, 2007 and January 1, 2006 to June 30, 2006, respectively.

For the quarter ended June 30, 2007, the Fund declared distributions of \$6.8 million or \$0.290 per unit. Actual distributions exceeded the calculation of cash available for distribution by \$2.4 million or \$0.104 per unit for the quarter ended June 30, 2007. For the same period in 2006, the calculation of cash available for distribution exceeded actual distributions by \$0.8 million or \$0.053 per unit. If the integration costs of \$2.4 million and the capital expenditures of \$1.0 million related to the integration and incurred during the quarter were excluded, cash available for distribution would have exceeded actual distributions by \$1.0 million or \$0.039 per unit. For the six months ended June 30, 2006, the Fund declared distributions of \$13.6 million or \$0.579 per unit. Actual

distributions exceeded the calculation of cash available for distribution by \$1.9 million or \$0.080 per unit. For the same period in 2006, the calculation of cash available for distributions exceeded actual distributions by \$2.2 million or \$0.151 per unit. If the integration costs of \$3.4 million and the capital expenditures of \$1.0 million related to the integration and incurred for the six months ended June 30, 2007 were excluded, cash available for distribution would have exceeded actual distributions by \$2.5 million or \$0.108 per unit.

Distributions paid by the Fund on its outstanding trust units during the quarter ended June 30, 2007 were funded entirely from cash generated by the Data Group's operations.

Table 3 The following table sets out selected historical financial information for the periods noted.

The period from January 1, 2007 to June 30, 2007 includes results of operations of the Relizon Canada business.

Cash Available for Distribution

For the periods ended June 30, 2007 and 2006 <i>(in thousands of dollars, except per unit amounts, unaudited)</i>	Apr. 1 to Jun. 30, 2007	Apr. 1 to Jun. 30, 2006	Jan. 1 to Jun. 30, 2007	Jan. 1 to Jun. 30, 2006
	\$	\$	\$	\$
Cash provided by operating activities	9,093	7,703	12,632	11,827
<i>Capital adjustments</i>				
Maintenance capital expenditures ⁽¹⁾	(1,618)	(320)	(2,752)	(746)
<i>Other adjustments including discretionary items:</i>				
Non-cash interest expense ⁽²⁾	43	77	86	153
Changes in non-cash working capital and other ⁽⁴⁾	(3,163)	(2,293)	1,750	(235)
Cash income taxes ⁽³⁾	-	312	-	312
Cash available for distribution	4,355	5,090	11,716	10,846
Distributions to Unitholders ⁽⁵⁾	6,801	4,305	13,602	8,610
Excess (shortfall) of cash available for distribution over actual distributions	(2,446)	785	(1,886)	2,236
<i>Per unit ⁽⁶⁾</i>				
Cash available for distribution per unit ⁽⁶⁾	0.186	0.343	0.499	0.730
Distributions to Unitholders per unit ⁽⁶⁾	0.290	0.290	0.579	0.579
Excess (shortfall) of cash available for distribution per unit over actual distributions per unit	(0.104)	0.053	(0.080)	0.151
Payout ratio	156.2%	84.6%	116.1%	79.4%

Notes:

- ⁽¹⁾ Maintenance capital expenditures are additions, replacements or improvements to property, plant and equipment to maintain the Data Group's business operations. These expenditures involve the replacement of printing and digital equipment, computers and software, and leasehold improvements.
- ⁽²⁾ Non-cash interest expense is interest expense calculated in accordance with GAAP associated with accretion of convertible debentures and the unfavourable lease obligation.
- ⁽³⁾ Cash income taxes are current income taxes calculated in accordance with GAAP.
- ⁽⁴⁾ Cash provided by operating activities has been adjusted for changes in non-cash working capital so as to remove the impact of timing differences in cash receipts and cash disbursements, which generally reverse themselves but can vary significantly across quarters.
- ⁽⁵⁾ Distributions are in respect of the distributions declared and paid.
- ⁽⁶⁾ Per unit calculations are based upon the number of units outstanding at the end of each month consistent with the number of units upon which distributions are declared and paid and not the weighted average number of units outstanding. As at June 30, 2007, 23,475,659 units were outstanding and 14,861,333 units were outstanding as at June 30, 2006.

Table 4 The following table sets out selected historical financial information for the periods noted.

The period from January 1, 2007 to June 30, 2007 includes results of operations of the Relizon Canada business.

Excess Cash Flows and Net (Loss) Income Over Distributions Paid

<i>(in thousands of dollars, except per unit amounts, unaudited)</i>	Apr. 1 to Jun. 30, 2007 \$	Jan. 1 to Jun. 30, 2007 \$	Jan. 1 to Dec. 31, 2006 \$	Dec. 21, 2004 to Dec. 31, 2005 \$

Excess (shortfall) of net (loss) income over cash distributions paid	(15,296)	(18,287)	7,343	(6,485)

EXCESS (SHORTFALL) OF CASH PROVIDED BY OPERATING ACTIVITIES OVER CASH DISTRIBUTIONS PAID

See Table 3 above for a reconciliation from cash provided by operating activities to cash available for distribution.

EXCESS (SHORTFALL) OF NET INCOME OVER CASH DISTRIBUTIONS PAID

For the quarter and six months ended June 30, 2007, the Fund's net income included \$2.4 million and \$4.8 million, respectively, in non-cash amortization of intangible assets. In both those periods, the Fund also incurred a \$9.7 million non-cash expense for future income taxes as discussed above in "Income Taxes".

For the year ended December 31, 2006, the Fund's net income included a \$14.9 million non-cash recovery of future income taxes, offset by \$7.6 million in non-cash amortization of intangible assets.

For the period from December 21, 2004 to December 31, 2005 the Fund's net income included \$6.8 million in non-cash amortization of intangible assets.

Notes:

- (1) Includes results of operations of the Relizon Canada business for the period from August 31, 2006 to September 30, 2006.
- (2) Includes results of operations of the Relizon Canada business for the three months ended.
- (3) Includes a \$0.8 million distribution on the 8.6 million units issued on August 31, 2006, while no corresponding EBITDA was earned by the Fund from the operations of the Relizon Canada business, save the one business day of August 31, 2006.
- (4) Includes integration expenses of \$1.1 million and \$2.4 million for Q1 2007 and Q2 2007, respectively, and capital expenditures of \$1.0 million for Q2 2007.

CASH FLOW FROM OPERATIONS

Changes in non-cash working capital increased cash by \$3.2 million in the quarter ended June 30, 2007. Inventory levels decreased by \$3.0 million as a result of inventory purchased for specific production requirements in the first quarter of 2007 being produced and sold to customers of the DATA East and West segment. Changes in non-cash working capital decreased cash by \$1.7 million for the six months ended June 30, 2007. Accounts receivable decreased by \$4.6 million as a result of collections from the fourth quarter activity of 2006 and the first quarter activity of 2007. Inventory levels decreased by \$3.7 million as a result of inventory purchased for specific production requirements in the fourth quarter of 2006 and the first quarter of 2007 being produced and sold to customers of the DATA East and West segment. Accounts payable and accrued liabilities and accrued restructuring and integration provisions decreased by \$9.9 million as a result of payments to suppliers from the first quarter 2007 activity.

INVESTING ACTIVITIES

The Data Group takes a disciplined approach to monitoring its investments, whereby material capital expenditures are subjected to rigorous analysis and ongoing measurement and comparison against budgets to ensure a return on the investment. The Data Group's maintenance capital expenditures consist of replacement of existing capital assets to sustain cash flows, and typically include furniture, fixtures, computer equipment, printing equipment, and leasehold improvements. The Data Group's growth capital expenditures consist of purchases of capital assets to generate new cash flows, and typically include the purchase of new furniture, fixtures, computer equipment and printing equipment to support new business and organic business growth. In addition to maintenance and growth capital expenditures, the Data Group incurs recurring repair and maintenance expense that are expensed as they are incurred and not included in capital expenditures.

Capital expenditures for the quarter ended June 30, 2007 of \$1.6 million related primarily to maintenance capital expenditures and included \$1.0 million of maintenance capital expenditures for leasehold improvements required for the installation and upgrading of equipment transferred in connection with the closure of four plants. Capital expenditures for the six months ended June 30, 2007 of \$2.8 million related primarily to maintenance capital expenditures, and included \$1.0 million of maintenance capital expenditures for leasehold improvements required for the installation and upgrading of equipment transferred in connection with the closure of four plants. These capital expenditures were incurred in connection with the integration of the Relizon Canada business are not expected to recur. The level of capital expenditures in the combined businesses of DBFL and Relizon Canada for the balance of 2007 is expected to be approximately \$2.0 million.

FINANCING ACTIVITIES

For the quarter ended June 30, 2007, the Fund paid cash distributions of \$6.8 million to its Unitholders. For the six months ended June 30, 2007, the Fund paid cash distributions of \$13.6 million to its Unitholders.

Table 6**Eight Quarter Results of Operations - Summary***(in thousands of**dollars, except per unit**amounts, unaudited)*

	2007		2006			2005		
	Q2 ⁽²⁾⁽⁴⁾	Q1 ⁽²⁾	Q4 ⁽²⁾	Q3 ⁽¹⁾⁽³⁾	Q2	Q1	Q4	Q3
	\$	\$	\$	\$	\$	\$	\$	\$

Notes:

- (1) *Includes results of operations of the Relizon Canada business for the period from August 31, 2006 to September 30, 2006.*
- (2) *Includes results of operations of the Relizon Canada business for the three months ended.*
- (3) *Net income included a \$14.9 million recovery of future taxes as a result of the Fund's Reorganization on September 30, 2006.*
- (4) *Net income included a \$9.7 million future tax expense as a result of Bill C-52 becoming law, which contained the SIFT rules regarding the taxation of income trusts.*

DISCLOSURE CONTROLS AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

With the supervision and participation of the Data Group's senior management team, the Chief Executive Officer and the Chief Financial Officer of the Data Group have evaluated the effectiveness of the design and operation of the disclosure controls and procedures (as defined in Multilateral Instrument 52-109) of the Fund and the Data Group, as of June 30, 2007. Based on that evaluation, those officers have concluded that such disclosure controls and procedures are sufficiently effective to provide reasonable assurance that material information relating to the Fund and the Data Group is made known to management and disclosed in accordance with the applicable securities laws.

With the supervision and participation of the Data Group's senior management team, the Chief Executive Officer and the Chief Financial Officer of the Data Group have evaluated the design of the internal controls over financial reporting (as defined in Multilateral Instrument 52-109) of the Fund and the Data Group, as of June 30, 2007. Based on that evaluation, those officers have concluded that such internal controls over financial reporting are sufficiently effective to provide reasonable assurance regarding the reliability of the Fund's financial reporting and the preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles.

The Fund acquired the Relizon Canada business on August 31, 2006. The Data Group is continuing the documentation and assessment of the design of internal controls over financial reporting for that business and will finalize that review in 2007, following the completion of restructuring and integration initiatives.

There were no changes in the Fund's internal controls over financial reporting during the most recent interim reporting period that have materially affected, or are reasonably likely to materially affect, the Fund's internal controls over financial reporting.

OUTLOOK

Management believes that the Fund will continue to meet its objectives, continuing to meet its monthly per unit distributions to Unitholders of \$0.09656. The Fund's Board of Trustees does not currently anticipate increasing distributions to Unitholders based on the contribution of the Relizon Canada Acquisition, but will continue to monitor the Fund's cash available for distributions and its payout ratio.

In July 2007, the Fund announced that the Data Group had agreed to sell its Brockville, Ontario facility to Capital Wapiti for approximately \$4.5 million and to lease back that facility from Capital Wapiti for a period of 10 years, subject to certain renewal rights in favour of the Data Group. Completion of this transaction is subject to several conditions. See "Recent Developments – Proposed Sale and Leaseback of Brockville, Ontario Facility". This transaction is part of the Data Group's integration and restructuring of the Relizon Canada business. If completed upon the terms currently contemplated by the parties, the Data Group expects to use the net proceeds from the sale of the Brockville, Ontario facility to fund restructuring and integration costs. The leaseback of the building will result in additional annual lease costs of \$374,536 per year for the first five years and \$421,353 per year during the following five-year period.

As discussed in the Fund's MD&A for the year ended December 31, 2006, management has developed a plan to integrate and restructure the Relizon Canada business. On March 1, 2007, the Fund announced a restructuring plan resulting in the closure of four plants, the elimination of 121 jobs and the transfer of 99 jobs to other facilities. The plants to be closed in the proposed restructuring are located in Dorval, Quebec; Hemmingford, Quebec; Orangeville, Ontario; and Medicine Hat, Alberta. The plants had all substantially ceased operations as of June 30, 2007. As a result of this plan, the Data Group has recognized restructuring costs and provisions relating to the termination of certain employees of the acquired business and for other costs to exit or terminate specific leases and contracts which the Data Group intends to modify or terminate. In addition to the plan announced on March 1, management has completed other initiatives to reduce management, sales and administration expenses. These restructuring and related liabilities are based on contractual obligations and management's best estimates and have been recognized as assumed liabilities in the preliminary purchase price allocation as they were contemplated at the time of the Relizon Canada Acquisition, and were therefore included in the underlying net identifiable assets acquired. The Data Group will continue to review its operations and undertake restructuring initiatives to maintain a competitive cost structure. These initiatives may result in the further consolidation of facilities, and the Data Group may incur additional severance costs, accelerated further depreciation expense, impairment charges related to property, plant and equipment, goodwill, and costs attributable to the termination of contracts for leases, supplier arrangements and other contractual obligations. The Fund believes that restructuring charges are likely to occur in 2007 as the Data Group continues to rationalize sales and operations as a result of the Relizon Canada Acquisition and other initiatives. Additional unanticipated costs may also be incurred to integrate the Relizon Canada business. Any costs relating to the closure of facilities leased by the Data Group prior to the acquisition will be expensed as incurred. These expenses will result in some variability in the Fund's quarterly operating results in 2007.

Management currently believes that the Data Group's restructuring, integration and other initiatives relating to the combination of the former DBFL and Relizon Canada businesses will achieve synergies and cost savings of \$8.0 million to \$10.0 million.

On June 22, 2007, Bill C-52 received Royal Assent. As a result, publicly traded Canadian resident trusts (a "SIFT"), including the Fund, will be subject to tax on the "non-portfolio earnings" distributed to its Unitholders at a rate similar to the combined federal and provincial corporate rates.

"Non-portfolio earnings" of a SIFT are generally income of the SIFT attributable to a business carried on by the SIFT in Canada or income from, or capital gains from the disposition of "non-portfolio properties". "Non-portfolio properties" of a SIFT include securities of a "subject entity" if the SIFT holds securities of the subject entity that have a fair market value greater than 10% of the subject entity's equity value, or if the SIFT holds securities of the subject entity that, together with securities held by the SIFT in entities affiliated with the subject entity, have a total fair market value greater than 50% of the equity value of the SIFT. A subject entity is a corporation resident in Canada, a trust resident in Canada, a Canadian resident partnership, or a non-resident person or partnership if the principal source of income is from one or more sources in Canada.

If a SIFT has "non-portfolio earnings" that are considered to have become payable to its beneficiaries in the year, this amount will be deemed to be a taxable dividend paid by a taxable Canadian corporation to the beneficiaries, which will be eligible for the enhanced tax credit if paid to an individual resident in Canada.

Generally, there will be a four year transition period for a SIFT, such as the Fund, the units of which were publicly listed on October 31, 2006, and the SIFT will not be subject to the tax imposed under these rules until 2011, provided the Fund does not exceed its "normal growth", as determined by reference to the "normal growth" guidelines issued by the Department of Finance on December 15, 2006, as amended from time to time (the "Guidelines").

Management expects that the tax changes will, all other things being equal, likely result in a reduction of cash available for distribution from the Fund commencing in 2011. With respect to the limitations on equity unit issuances under the Guidelines, the Fund believes that it should be able to fund its currently identified growth plan without exceeding its "normal growth". However, with the current uncertainty in the capital markets resulting from the tax changes, there can be no assurance that sufficient capital to fund further acquisitions or expansion projects will be available on terms acceptable to the Fund, or at all. The Fund, with input from external legal and financial advisors, is closely monitoring the SIFT rules and carefully assessing their impact on the business and financial outlook of the Fund and the Data Group and its broader effect on the income trust sector as a whole, all with a view to adopting a strategy that will maximize value to Unitholders going forward.

Management believes that the acquisition of Relizon Canada has introduced a marginal amount of seasonality into the business. The gift card business as well as the buying pattern of a major customer appear to indicate that the fourth quarter may have higher revenues and profit than the other three quarters.

The Data Group will continue its strategic focus on being the leading document management service provider in Canada, concentrating on providing high value-added products and services. The Data Group will also pursue acquisition opportunities within its existing business segments.

DISTRIBUTIONS

The Fund has adopted a policy that the Fund will distribute all of its cash available for distribution to the maximum extent possible to Unitholders by monthly cash distributions of its net monthly cash receipts, less estimated amounts required for the payment of expense obligations, taxes and cash redemptions of units.

The Data Group has adopted a policy that the Data Group will distribute all of its available cash, subject to applicable law, by way of monthly distributions on its partnership interests (all of which are held directly or indirectly by the Fund), after satisfaction of its debt service obligations and other expense obligations (including pension liabilities), retaining amounts for capital expenditures, reasonable and appropriate working capital, and satisfaction of its obligations under the Data Group's long-term incentive plan.

The Fund's Board of Trustees does not currently anticipate increasing distributions to Unitholders based on the contribution of the Relizon Canada Acquisition but will continue to monitor the Fund's cash available for distributions and its payout ratio.

The following is a summary of the declared distributions, record dates and payment dates in respect of the units in 2007:

Record Date	Payment Date	Per Unit	Amount
January 31, 2007	February 15, 2007	\$0.09656	\$2.267 million
February 28, 2007	March 15, 2007	\$0.09656	\$2.267 million
March 30, 2007	April 13, 2007	\$0.09656	\$2.267 million
April 30, 2007	May 15, 2007	\$0.09656	\$2.267 million
May 31, 2007	June 15, 2007	\$0.09656	\$2.267 million
June 29, 2007	July 13, 2007	\$0.09656	\$2.267 million

CONTRACTUAL OBLIGATIONS

In the six months ended June 30, 2007, the Data Group entered into a three year operating lease for printing equipment, which will increase contractual obligations for operating leases by \$2.1 million in 2007, \$2.8 million in 2008, \$2.8 million in 2009 and \$0.7 million in 2010.

NEW ACCOUNTING POLICIES

Effective January 1, 2007, the Fund adopted the Canadian Institute of Chartered Accountants Section 3855, Financial Instruments – Recognition and Measurement; Section 3865, Hedges; Section 1530, Comprehensive Income, Section 3861 Financial Instruments – Disclosure and Presentation; and Section 3251, Equity. The adoption of these new standards resulted in changes in accounting for financial instruments, and hedges as well as the recognition of certain transition adjustments have been recorded in opening accumulated other comprehensive income. These changes were applied retroactively without the restatement of comparative financial statements. The Fund has adopted a policy to expense financing costs and therefore, upon adoption of these sections, deferred financing costs of \$2,601, net of related future income taxes of \$289 were charged to opening retained earnings.

FINANCIAL ASSETS AND LIABILITIES

Under Section 3855, financial assets and financial liabilities are initially recognized at fair value and are subsequently accounted for based on their classification as described below. The classification depends on the purpose for which the financial instruments were acquired and their characteristics. Subsequent to the initial recognition, financial instruments are measured at fair value, amortized cost or cost depending on the financial instrument classification.

Held for trading

Financial assets that are purchased and incurred with the intention of generating profits in the near term are classified as held for trading. These instruments are accounted for at fair value with the change in the fair value recognized in net income for the period. The Fund has classified cash and cash equivalents as held for trading. This classification had no impact on the financial statements.

Receivables and payables

Receivables and payables are accounted for at amortized cost. This category includes all trade receivables and payables and had no impact on the financial statements.

Revolving bank facility and convertible debentures

The Data Group's revolving bank facility and Convertible Debentures are accounted for at amortized cost using the effective interest rate method. This classification had no impact on the financial statements.

EMBEDDED DERIVATIVES

Derivatives may be embedded in other financial and non-financial instruments. Prior to the adoption of the new standards, embedded derivatives were not accounted for separately from the host contract instrument except in certain circumstances. Under the new standards, embedded derivatives are treated as separate derivatives when their economic characteristics and risks are not clearly and closely related to those of the host instrument, the terms of the embedded derivative are the same as those of a standalone-derivative and the combined contract is not held for trading or designated at fair value. These embedded derivatives are measured at fair value with subsequent changes recognized in the statement of operations as an element of general and administrative expenses. The Fund selected December 21, 2004 as a transition date to recognize as separate assets and liabilities the derivatives embedded in the contracts issued, acquired or substantively modified by the Fund on or after the transition date. The impact of the change in accounting policy related to embedded derivatives had no impact on the financial statements.

HEDGE ACCOUNTING

The Data Group has entered into interest rate swap contracts with its lenders. The interest rate swap contracts meet the criteria for cash flow hedges which under Section 3865 and 3855 are measured at fair value with the unrealized gains and losses on effective hedges recorded in other comprehensive income and the ineffective portion in the net income of the period. Amounts accumulated in other comprehensive income are reclassified to the consolidated statement of income in the period in which the hedged item affects net income. Upon adoption of the standard, the Data Group recorded an unrealized gain on revaluation of the interest rate swap of \$58. For the quarter ended June 30, 2007, an additional gain of \$622 was recognized. For the six months ended June 30, 2007, an additional gain of \$685 was recognized. The related asset of \$743 is included in prepaid expenses and other current assets for the six months ended June 30, 2007.

COMPREHENSIVE INCOME (LOSS)

Section 1530 establishes standards for reporting and presenting comprehensive income (loss). Comprehensive income (loss) includes net income (loss) and other comprehensive income (loss).

Other comprehensive income (loss) includes changes in the fair market value of derivative instruments designated as cash flow hedges.

RISKS AND UNCERTAINTIES

An investment in the Units involves risks. In addition to the other information contained in this report, investors should carefully consider the risks described below before investing in units. The risks described below are not the only ones facing the Fund and/or the Data Group. Additional risks not currently known to the Fund and/or the Data Group, or that the Fund and/or the Data Group currently believe are immaterial may also impair the business, results of operations, financial condition and liquidity of the Data Group, and the ability of the Fund to make distributions on the Units.

RISKS RELATED TO THE BUSINESS

POTENTIAL UNDISCLOSED LIABILITIES ASSOCIATED WITH THE RELIZON CANADA ACQUISITION

There may be liabilities and contingencies that the Fund did not discover in its due diligence prior to consummation of the Relizon Canada Acquisition and the Fund may not be indemnified for some or all of these liabilities and contingencies. The discovery of any material liabilities or contingencies could have a material adverse effect on the Fund's business, financial condition, liquidity and results of operations.

INTEGRATION OF RELIZON CANADA INTO THE DATA GROUP

The operations of the Data Group and Relizon Canada were conducted as separate and distinct businesses prior to the Relizon Canada Acquisition, each with its own management team, sales force and operations. On March 1, 2007 the Fund announced a restructuring plan in connection with the integration of the Data Group and Relizon Canada businesses. Under the restructuring plan, the Data Group has reduced its workforce by 121 jobs, relocated certain employees to other Data Group facilities and closed plants in Québec, Ontario and Alberta. These activities resulted in production interruptions at some of the Data Group's facilities during the second quarter of 2007. There can be no assurance that other problems will not arise in the future in connection with the integration. The Data Group could face contractual and other restrictions on its ability to implement expected cost reductions. The Data Group may not be able to realize anticipated cost savings and efficiencies from that restructuring initiative and other efforts to integrate the two businesses. There can be no assurance that unforeseen costs and expenses, including those related to compensation costs, or other factors will not offset, in whole or in part, the expected cost savings or other components of the respective operating plans. In particular, the Data Group has assumed that its assumptions regarding average compensation costs and average years of service for those employees affected by its restructuring plan are materially correct and that the restructuring is executed in a timely manner. Further, the transfer and integration of employees from one facility to another may require substantial attention from, and place substantial demands upon, senior management of the Data Group, as well as require the cooperation of employees. Failure to successfully complete the integration of the

operations of the Data Group and Relizon Canada could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

INABILITY TO SUSTAIN AND MANAGE ORGANIC GROWTH

A principal component of the Data Group's strategy is to continue its internal growth. The Data Group may not be successful in growing its business or in managing its organic growth and a failure to do so could have a material adverse effect on its business, financial condition, liquidity and results of operations and the amount of cash available for distribution to Unitholders. The Data Group's growth depends on its ability to accomplish a number of things, including, successfully introducing new products; identifying and developing new geographic markets; developing new products and gaining market acceptance for them; establishing and maintaining favourable relationships with customers in new markets and market segments and maintaining these relationships in existing markets; and successfully managing expansion and obtaining the required financing. Any growth the Data Group achieves may require additional employees and an increase in the scope of both its operation and financial systems and the geographic area of its operations.

COMPETITION FROM COMPETITORS SUPPLYING SIMILAR PRODUCTS AND SERVICES

Some of the Data Group's competitors have economic resources greater than those of the Data Group and are well-established suppliers. If consolidation in the document management or printing industry occurs, some competitors may become larger and pose an additional competitive threat to the business of the Data Group. A competitor may reduce the price of its products or services in an attempt to gain increased sales, and the corresponding pricing pressure placed on the Data Group may result in reduced profit margins or cash flow. A loss of business may occur if the Data Group does not meet competitive prices that fall below its profitability targets. Several of the Data Group's products and services are sold into select market segments and there can be no assurance that these segments will not attract additional competitors that could have greater financial, technological, manufacturing and marketing resources than the Data Group.

LIMITED GROWTH IN THE PRINTING OF TRADITIONAL BUSINESS FORMS

The overall printing industry is highly competitive and has not grown over the last several years and, accordingly, it may be difficult for the Data Group to grow its sales or even maintain historical levels of its sales of printed business documents. The Data Group has depended heavily on sales of printed business forms, which accounted for approximately 26% of the Data Group's revenues in fiscal 2006. However, the overall printed forms industry has not grown in the last few years due to technological advancements resulting in the decline in the use of traditional paper-based forms. In addition, the printed document industry historically has been affected by general economic and industry cycles that have materially and adversely affected print distributors and print manufacturers. Accordingly, for the Data Group to continue to experience growth in printed document sales, the Data Group must increase its market share and individual customer share and respond to changes in demand in this segment of the industry. The Data Group also faces competition from alternative sources of communication and information transfer, such as facsimile machines, electronic mail, and the Internet. These sources of communication and advertising may adversely impact printed product sales in the future.

INCREASES IN THE COST OF PAPER OR OTHER RAW MATERIALS

In fiscal 2006, the cost of paper, carbon and other raw materials represented approximately 35.7% of the Data Group's related revenues. Increases in paper costs could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations. The Data Group cannot be certain that the Data

Group will be able to pass on future increases in the cost of paper to its customers consistent with industry practice. Moreover, rising paper costs and their consequent impact on the Data Group's pricing could lead to a decrease in the volume of products sold. The overall paper market is beyond the Data Group's control, and as a result, the Data Group cannot be certain that future paper price increases will not result in decreased volumes and decreased cash flow and profitability.

Due to the significance of paper in the manufacture of most of the Data Group's products, the Data Group is dependent upon the availability of paper. During periods of tight paper supply, many paper producers allocate shipments of paper based on the historical purchase levels of customers. Unforeseen developments in world paper markets coupled with shortages of raw paper could result in a decrease in supply, which would cause a decrease in the volume of product the Data Group could produce and sell, and could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

Additionally, the Data Group utilizes a number of raw materials, including carbon, ink, film, offset plates, chemicals and solvents, glue, wire and subcontracted components, that are subject to price fluctuations beyond its control. There has generally been a lag time before those increases could be passed on to the Data Group's customers. There can be no assurance that the price of the Data Group's raw materials will not increase in the future or that the Data Group will be able to pass on those increases to its customers consistent with industry practice. A significant increase in the price of raw materials that cannot be passed on to customers could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations. The Data Group cannot be certain that a shortage of any of these raw materials will not occur in the future or what effect, if any, such a shortage would have on the Data Group's cash flow and profitability.

CUSTOMER RELATIONSHIPS

The Data Group typically does not enter into long-term, written agreements with customers. As a result, there is a risk that customers may, without notice or penalty, terminate their relationship with the Data Group at any time. In addition, even if customers should decide to continue their relationship with the Data Group, there can be no guarantee that customers will purchase the same amount as in the past, or that purchases will be on similar terms. A loss of several customers, a substantial decrease in order volumes from several customers, a loss of a significant customer or a change in the terms of the relationship with a significant customer could have an adverse impact on the Data Group's financial performance.

SEASONALITY

Sales of some of the Data Group's products are subject to predictable marginal seasonal fluctuations in demand. While certain variable costs can be managed to match seasonal patterns, a significant portion of costs, including rent, are fixed and cannot be adjusted for seasonality. Management believes that the acquisition of Relizon Canada has introduced a marginal amount of seasonality into the business. The gift card business as well as the buying pattern of a major customer appear to indicate that the fourth quarter may have higher revenues and profit than the other three quarters.

FAILURE TO DEVELOP PRODUCT AND SERVICE OPTIONS

The Data Group's ability to continue to generate comparable net income is based, in part, on the addition of new products and services which could be sold to existing and prospective customers. There can be no assurance that the Data Group will develop new products or services that will receive market acceptance or that those new products or services will yield favourable margins. The failure to develop and successfully market new products and services at favourable margins could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

EXPANSION THROUGH ACQUISITIONS

The acquisition and development of existing businesses to be operated by the Data Group will be dependent on the ability of the Data Group to identify, acquire and develop suitable acquisition targets in both new and existing markets. While it is intended that the Data Group will be careful in selecting businesses to acquire, acquisitions involve a number of risks, including the possibility that Data Group pays more than the acquired assets are worth; the additional expense associated with completing an acquisition and amortizing any acquired intangible assets; the difficulty of assimilating the operations and personnel of the acquired business; the challenge of implementing uniform standards, controls procedures and policies throughout the acquired business; the inability to integrate, train, retain and motivate key personnel of the acquired business; the potential disruption of the Data Group's ongoing business and the distraction of management from its day-to-day operations; the inability to incorporate acquired businesses successfully into the Data Group's operations; and the potential impairment of relationships with the Data Group's employees, customers and strategic partners. Such risks, if they materialize, could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

In addition, the Data Group may not be able to maintain the levels of operating efficiency that any acquired companies had achieved or might have achieved separately. Successful integration of each of the acquired company's operations would depend upon the Data Group's ability to manage those operations and to eliminate redundant and excess costs. As a result of difficulties associated with combining operations, the Data Group may not be able to achieve the cost savings and other benefits that it would hope to achieve with these acquisitions. Any difficulties in this process could disrupt the Data Group's ongoing business, distract its management, result in the loss of key personnel or customers, increase its expenses and otherwise materially adversely affect its business, financial condition, liquidity and results of operations.

In the event of any future acquisitions, the Fund could issue additional Units, which would dilute its existing Unitholders' interests, incur debt or assume liabilities. The Fund cannot assure investors that this will not have a material adverse effect on the Data Group's business, financial condition, liquidity and operating results. Additional indebtedness would make the Data Group more vulnerable to economic downturns and may limit its ability to withstand competitive pressures. The terms of any additional indebtedness may include restrictive financial and operating covenants, which would limit the Data Group's ability to compete and expand.

OPERATING HAZARDS

The Data Group's revenues are dependent on the continued operation of its facilities. The operation of the Data Group's facilities involves a number of risks, including the failure or substandard performance of equipment, natural disasters, suspension of operations and new governmental statutes, regulations, guidelines and policies. The Data Group may also have exposure to future claims with respect to workplace exposure, workers'

compensation and other matters. There can be no assurance as to the actual amount or the timing of these liabilities. The occurrence of material operational problems, including but not limited to the above events, may have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations and the amount of cash available for distribution to Unitholders.

NEGOTIATION OF COLLECTIVE AGREEMENTS

Current union agreements are typically three years in duration and are subject to expiration at various times in the future. The collective agreement with respect to the unionized employees at the Data Group's facility in Anjou, Québec expired on April 30, 2007. The Data Group is negotiating the contract and does not anticipate a labour disruption. If the Data Group is unable to renew union agreements as they become subject to renegotiation from time to time, it could result in work stoppages and other labour disturbances that could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

AN ADVERSE CHANGE IN LABOUR RELATIONS

As of June 30, 2007, the Data Group employed approximately 2,063 employees, of whom approximately 18% are members of various local labour unions. If unionized employees were to engage in a concerted strike or other work stoppage, or if other employees were to become unionized, the Data Group could experience a disruption of operations, higher labour costs or both. A lengthy strike could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

PENSION LIABILITIES AND UNFUNDED BENEFIT PLANS

Applicable pension legislation requires that the funded status of the Data Group's registered defined benefit pension plans be determined periodically on both a going concern basis (i.e., essentially assuming indefinite plan continuation) and a solvency basis (i.e., essentially assuming immediate plan termination).

Where an actuarial valuation reveals a solvency deficit, current regulations require it to be funded by equal payments over a maximum period of five years from the date of valuation. The solvency liability is influenced primarily by long-term interest rates and by the investment return on plan assets and also by certain statutory benefit enhancements that may apply on a plan termination. The interest rate used to calculate benefit obligations for solvency purposes is a prescribed rate derived from the interest rates on long-term Government of Canada bonds. In the current low interest rate environment, the calculation results in a higher present value of the pension obligations, leading to a larger unfunded solvency position.

Following the closing of the Relizon Canada Acquisition, the Data Group made a \$4.0 million payment in respect of certain underfunded pension liabilities of Relizon Canada. Even with such payment and the five year amortization period for solvency funding, the Data Group may have to make substantial annual or one-time cash contributions to the pension plans of the Data Group, including, without limitation, in connection with any reduction of support services or integration of facilities, and the level of those contributions will increase in the event of poor pension fund investment performance and/or further declines in long-term Government of Canada bond rates.

Certain senior executives of Relizon Canada participated in a Supplementary Executive Retirement Plan ("SERP"), which provides for pension benefits payable as a single life annuity with a five year guarantee. Upon

completion of the Relizon Canada Acquisition and related transactions, the SERP became an obligation of the Data Group. The SERP is unfunded and will be paid out of the general revenues of the Data Group.

Certain employees of Relizon Canada were provided with post-employment and post-retirement benefits, including health care and life insurance benefits on retirement and unfunded long-term disability benefits to certain former or inactive employees, their beneficiaries and covered dependents. These post-employment and post-retirement benefits are funded on a pay-as-you-go basis.

PROPRIETARY RIGHTS MAY NOT BE ADEQUATELY PROTECTED

The Data Group's success and ability to compete depends in part upon its proprietary technology, trademarks and copyrights. The Data Group regards the software underlying its DDM/INFORMA® system as proprietary, and relies primarily on trade secrets, copyright and trademark law to protect these proprietary rights. The Data Group, including Relizon Canada, have registered some of their trademarks and patents. Existing trade secrets and copyright laws afford only limited protection. Unauthorized parties may attempt to copy aspects of the Data Group's software or to obtain and use information that the Partnership regards as proprietary. Policing unauthorized use of the Data Group's software is difficult. The Data Group generally enters into confidentiality and assignment agreements with the Data Group's employees and generally controls access to and distribution of the Data Group's software, documentation and other proprietary information. Despite these precautions, it may be possible for a third party to copy or otherwise obtain and use the Data Group's services or technology without authorization, or to develop similar services or technology independently. The Data Group is not aware that any of its owned software, trademarks or other proprietary rights that are material to the operations of its business infringe the proprietary rights of third parties. However, there can be no assurance that third parties will not assert infringement claims against the Data Group in the future. Any such claims, with or without merit, can be time consuming and expensive to defend and may require the Data Group to enter into royalty or licensing agreements or cease the alleged infringing activities.

UNINSURED AND UNDERINSURED LOSSES AND INSURANCE COSTS

The Data Group will use its discretion in determining amounts, coverage limits and deductibility provisions of insurance, with a view to maintaining appropriate insurance coverage on its assets at a commercially reasonable cost and on suitable terms. This may result in insurance coverage that, in the event of a substantial loss, would not be sufficient to pay the full current market value or current replacement cost of its assets. A substantial loss without adequate insurance coverage could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

The Data Group's cost of maintaining professional errors and omissions insurance and director and officer liability insurance is significant. The Data Group could experience higher insurance premiums as a result of adverse claims experience or because of general increases in premiums by insurance carriers for reasons unrelated to its own claims experience. Generally, the Data Group's insurance policies must be renewed annually. The Data Group's ability to continue to obtain insurance at affordable premiums also depends upon its ability to continue to operate with an acceptable claims record. A significant increase in the number of claims against the Data Group, the assertion of one or more claims in excess of its policy limits or the inability to obtain adequate insurance coverage at acceptable rates, or at all, could have a material adverse effect on the business, financial condition and results of operations of the Data Group and the ability of the Fund to make distributions on the Units.

ENVIRONMENT, HEALTH AND SAFETY REQUIREMENTS

The Data Group's operations are subject to a complex and onerous legislative regime, including laws, statutes, regulations, by-laws, guidelines and policies as well as permits and other approvals relating to the protection of the environment and workers' health and safety, governing, among other things, air emissions, water discharges, non-hazardous and hazardous waste (including waste water), the storage, handling, transportation and distribution of dangerous goods and hazardous materials, remediation of releases and the presence of hazardous materials, land use and zoning and employee health and safety (the "Environment, Health and Safety Requirements"). As a result of the Data Group's operations, it is or may be subject from time to time to orders, fines, penalties, civil claims, administrative and judicial proceedings and inquiries relating to Environment, Health and Safety Requirements. Any such incident could have a material adverse effect on the Data Group's business, financial condition, liquidity and/or results of operations.

In addition, changes to existing Environment, Health and Safety Requirements or the adoption of new Environment, Health and Safety Requirements in the future, changes to the enforcement of Environment, Health and Safety Requirements, as well as the discovery of additional or unknown conditions at facilities owned, operated or used by the Data Group, could require expenditures which might materially affect the business, financial condition, liquidity and/or results of operations.

DEPENDENCE ON KEY PERSONNEL

The success of the Data Group depends upon the personal efforts of a small group of senior management. Although the Data Group believes it will be able to replace its key employees within a reasonable time should the need arise, the loss of key personnel could have a material adverse effect on the Data Group's business, financial condition, liquidity and results of operations.

CREDIT FACILITY IS SUBJECT TO FLOATING INTEREST RATES

The Amended Credit Facility will be subject to floating interest rates and, therefore, is subject to fluctuations in interest rates. Interest rate fluctuations are beyond the Data Group's control and there can be no assurance that interest rate fluctuations will not have a significant adverse effect on the Data Group's financial performance.

RISK OF FUTURE LEGAL PROCEEDINGS

The Data Group is threatened from time to time with, or is named as a defendant in, various legal proceedings, including lawsuits based upon product liability, personal injury, breach of contract and lost profits or other consequential damage claims in the ordinary course of conducting its business. A significant judgment against the Company, or the imposition of a significant fine or penalty, as a result of a finding that the Data Group has failed to comply with laws or regulations. The result of these proceedings cannot be predicted with certainty. There can be no assurance that these matters will not have a material adverse effect on the Data Group's results of operations in any future period, and a substantial judgment could have a material adverse impact on the Data Group's business, financial condition, liquidity and results of operations.

The Data Group has received a letter on behalf of a former executive of Relizon Canada asserting certain entitlements arising from the termination of the former executive's employment following the completion of the Relizon Canada Acquisition. The letter indicates that the former executive may commence legal proceedings in respect of this matter. To date, no such proceedings have, to the knowledge of the Fund, been commenced. The

amount claimed by the former executive is not currently determinable. Although the Data Group intends to defend this claim vigorously, there can be no assurance that the Data Group will be successful in doing so, or that this dispute with the former executive will not have a material adverse impact on the Data Group.

LIMITED RECOURSE AGAINST THE RELIZON COMPANY

Unitholders do not have a direct statutory right or any other rights against The Relizon Company or any of its shareholders. The sole remedy of the Fund against The Relizon Company or any of its shareholders will be the Fund exercising its rights, under the share purchase agreement between the Fund and the Relizon Company executed in connection with the Relizon Canada Acquisition, to claim indemnification in respect of a breach of the representations and warranties in that agreement by The Relizon Company. The Relizon Company has represented and warranted in favour of the Fund that the information in the short form prospectus filed with securities regulatory authorities relating to Relizon Canada is true and correct. However, The Relizon Company has made no representation or warranty that the information pertaining to The Relizon Company in such short form prospectus constitutes full, true and plain disclosure.

RISKS RELATED TO THE STRUCTURE OF THE FUND

INCOME TAX MATTERS

Although the Fund and the Partnership are of the view that all expenses to be claimed by them in the determination of their respective incomes under the Tax Act will be reasonable and deductible in accordance with the applicable provisions of the Tax Act, there can be no assurance that the Tax Act or the interpretation of the Tax Act will not change, or that CRA will agree with the expenses claimed. If CRA successfully challenges the deductibility of expenses, the Partnership's taxable income and losses and indirectly that of the Fund or the Unitholders, will increase or change.

There can be no assurance that Canadian federal income tax law or the interpretation thereof, respecting the treatment of mutual fund trusts will not be changed in a manner which adversely affects the holders of Units. If the Fund ceases to qualify as a "mutual fund trust" under the Tax Act, the income tax consequences of holding Units could change materially and adversely in certain respects.

The Declaration of Trust provides that an amount equal to the taxable income of the Fund will be payable each year to Unitholders in order to reduce the Fund's taxable income to zero. Where in a particular year, the Fund does not have sufficient distributable cash to distribute such an amount to Unitholders, the Declaration of Trust provides that additional Units must be distributed to Unitholders in lieu of cash payments. Unitholders will generally be required to include an amount equal to the fair market value of those Units in their taxable income, notwithstanding that they do not directly receive a cash payment.

On October 31, 2003 the Department of Finance released, for public comment, proposed amendments to the Tax Act that relate to the deductibility of interest and other expenses for income tax purposes for taxation years commencing after 2004. In general, the proposed amendments may deny the realization of losses in respect of a business if there is no reasonable expectation that the business will produce a cumulative profit over the period that the business can reasonably be expected to be carried on. Management believes that it is reasonable to expect the business of the Partnership to produce a cumulative profit over the expected period that the business

will be carried on by the Partnership. In the February 23, 2005 Federal Budget, (the “2005 Budget”) the Minister of Finance indicated that a revised legislative proposal will be released at an early opportunity for public comment.

Currently, a trust will not be considered to be a mutual fund trust if it is established or maintained primarily for the benefit of non-residents unless all or substantially all of its property is property other than taxable Canadian property as defined in the Tax Act (Tax proposals released March 27, 2007 will amend this provision such that a trust will not be disqualified as a mutual fund trust if it meets this property requirement at the time when it can be reasonably considered that the trust is being maintained for the benefit of non-resident persons). On September 16, 2004, the Minister of Finance (Canada) released draft amendments to the Tax Act (the “September 16 Proposals”), under which a trust would lose its status as a mutual fund trust if the aggregate fair market value of all units issued by the trust held by one or more non-resident persons of partnerships that are not Canadian partnerships (or any combination thereof) is more than 50% of the aggregate fair market value of all the units issued by the trust, where more than 10% (based on fair market value) of the trust’s property is taxable Canadian property or certain other types of property. If the September 16 Proposals are enacted as proposed, and if, at any time, more than 50% of the aggregate fair market value of Units of the Trust were held by non-residents and partnerships other than Canadian partnerships (or any combination thereof), the Trust would thereafter cease to be a mutual fund trust. The September 16 Proposals do not currently provide any means of rectifying a loss of mutual fund trust status. On December 6, 2004, the Minister of Finance indicated that the September 16 Proposals are being further considered.

On September 8, 2005, the Department of Finance (Canada) released a consultation paper on tax and other issues related to publicly listed flow-through entities such as income trusts and limited partnerships and invited interested parties to make submissions prior to December 31, 2005. In addition, on September 19, 2005, the Minister of Finance (Canada) announced that he had requested that the CRA postpone providing advanced income tax rulings respecting flow-through entities effective immediately, that the Department of Finance (Canada) was closely monitoring developments in the flow-through entity market with a view to proposing measures in relation to the consultations and that consideration would be given to what, if any, transitional measures were appropriate. On November 23, 2005, the Minister of Finance (Canada) announced the end of this consultation process and no legislative amendments were proposed to change the taxation of income trusts or to impose tax on holdings of “restricted investment properties”. Instead the Minister of Finance (Canada) has tabled a Notice of Ways and Means Motion that will enhance the dividend gross-up and tax credit mechanism applicable to dividends paid by certain corporations after 2005. In addition, the CRA will resume providing advance income tax rulings in respect of flow-through entities.

On June 22, 2007, Bill C-52 received Royal Assent. As a result, a SIFT, generally, will be subject to tax on the “non-portfolio earnings” distributed to its unit holders at a rate similar to the combined federal and provincial corporate rates. “Non-portfolio earnings” of a SIFT are generally income of the SIFT attributable to a business carried on by the SIFT in Canada or income from, or capital gains from the disposition of non-portfolio properties. “Non-portfolio properties” of a SIFT include securities of a “subject entity” if the SIFT holds securities of the subject entity that have a fair market value greater than 10% of the subject entity’s equity value, or if the SIFT holds securities of the subject entity that, together with securities held by the SIFT in entities affiliated with the subject entity, have a total fair market value greater than 50% of the equity value of the SIFT. A subject entity is a

corporation resident in Canada, a trust resident in Canada, a Canadian resident partnership, or a non-resident person or partnership if the principal source of income is from one or more sources in Canada.

If a SIFT has “non-portfolio earnings” that are considered to have become payable to its beneficiaries in the year, this amount will be deemed to be a taxable dividend paid by a taxable Canadian corporation to the beneficiaries, which will be eligible for the enhanced tax credit if paid to an individual resident in Canada.

Generally, there will be a four year transition period for a SIFT, such as the Fund, the units of which were publicly listed on October 31, 2006, and the SIFT will not be subject to the tax imposed under these rules until 2011, provided the Fund does not exceed its “normal growth”, as determined by reference to the “normal growth” guidelines issued by the Department of Finance on December 15, 2006, as amended from time to time (the “Guidelines”).

Management expects that the tax changes, all other things being equal, likely result in a reduction of cash available for distribution from the Fund commencing in 2011. With respect to the limitations on equity unit issuances under the Guidelines, the Fund believes that it should be able to fund its currently identified growth plan without exceeding its normal growth plan. However, with the current uncertainty in the capital markets resulting from the tax changes, there can be no assurance that sufficient capital to fund further acquisitions or expansion projects will be available on terms acceptable to the Fund, or at all. The Fund, with input from external legal and financial advisors, is closely monitoring the SIFT rules and carefully assessing their impact on the business and financial outlook of the Fund and its broader effect on the income trust sector as a whole, all with a view to adopting a strategy that will maximize value to unit holders.

DEPENDENCE OF THE FUND ON THE DATA GROUP

The cash distributions to the Unitholders are entirely dependent on the ability of the Data Group to pay its interest obligations under the Notes, and dividends or other distributions on its common shares. Distributions to the Unitholders are entirely dependent on the ability of the Fund to pay its operating expenses and to pay distributions. In the conduct of the business of the Data Group, it pays expenses and incurs debt and obligations to third parties. These expenses, debts and obligations could impact the ability of the Data Group to produce positive operating results. The Fund’s ability to pay distributions is also subject to the risks encountered by the Data Group in the operation of its business and the results of operations and financial condition of the Data Group.

CREDIT FACILITIES AND RESTRICTIVE COVENANTS

The Data Group has third party debt service obligations under its existing credit facilities. The degree to which the Data Group is leveraged could have important consequences to the holders of the Units, including: (i) a portion of the Data Group’s cash flow from operations is dedicated to the payment of the principal and interest on its indebtedness, thereby reducing funds available for distribution to the Fund; (ii) certain of the Data Group’s borrowings are at variable rates of interest, which exposes the Data Group to the risk of increased interest rates. The Data Group’s ability to make scheduled payments of principal and interest on, or to refinance, its indebtedness depends on its future operating performance and cash flow, which are subject to prevailing economic conditions, prevailing interest rate levels, and financial, competitive, business and other factors, many of which are beyond its control.

The Data Group's credit facilities contain numerous restrictive covenants that limit the Data Group with respect to certain business matters. These covenants place restrictions on, among other things, the ability of the Data Group to incur additional indebtedness, to create liens or other encumbrances, to pay distributions or make certain other payments, investments, loans and guarantees and to sell or otherwise dispose of assets and merge or consolidate with another entity. A failure to comply with the obligations in the agreements in respect of the those credit facilities could result in an event of default which, if not cured or waived, could permit acceleration of the relevant indebtedness. If the indebtedness under the credit facilities were to be accelerated, there can be no assurance that the Data Group's assets would be sufficient to repay in full that indebtedness.

The Data Group's credit facilities have a six-year term. The Data Group may need to refinance its credit facilities at the conclusion of their term, and there can be no assurance that the Data Group will be able to do so or able to do so on terms as favourable as the existing credit facilities. If the Data Group is unable to refinance the existing credit facilities or is only able to refinance the existing credit facilities on less favourable and/or more restrictive terms, this may have a material adverse effect on the Data Group's financial position, which may result in a reduction or suspension of cash distributions to Unitholders. In addition, the terms of any new credit facilities may be less favourable or more restrictive than the terms of the existing credit facilities, which may indirectly limit or negatively impact the ability of the Fund to pay cash distributions to Unitholders.

CASH DISTRIBUTIONS ARE NOT GUARANTEED AND WILL FLUCTUATE WITH THE DATA GROUP'S PERFORMANCE

Although the Fund intends to distribute the income earned by the Fund less expenses of the Fund and amounts, if any, paid by the Fund in connection with the redemption Units, there can be no assurance regarding the amounts of income to be generated by the Fund or the Data Group. The actual amount distributed in respect of the Units depends upon numerous factors, including profitability, fluctuations in working capital, obligations under applicable credit facilities, the sustainability of margins, capital expenditures and payment of distributions by the Data Group. The market value of the Units may deteriorate if the Fund is unable to meet its distribution targets in the future and that deterioration may be material. In addition, the composition of cash distributions for tax purposes may change over time and may affect the after-tax return for investors.

NATURE OF UNITS

Securities such as the Units share certain attributes common to both equity securities and debt instruments. The Units do not represent a direct investment in the Data Group and should not be viewed by investors as units in the Data Group. As holders of Units, Unitholders will not have the statutory rights normally associated with ownership of shares of a corporation including, for example, the right to bring "oppression" or "derivative" actions. The Units represent a fractional interest in the Fund. The Fund's only assets will be securities of the Data Group. The price per Unit is a function of anticipated distributable cash of the Fund. The Units are not "deposits" within the meaning of the Canadian Deposit Insurance Act and are not insured under the provisions of that Act or any other legislation. Furthermore, the Fund is not a trust company and, accordingly, is not registered under any trust and loan company legislation as it does not carry on the business of a trust company.

POSSIBLE UNITHOLDER LIABILITY

The Declaration of Trust provides that no Unitholder shall be subject to any liability whatsoever to any person in connection with a holding of Units. However, in jurisdictions outside the Provinces of Ontario, Quebec and Alberta, there remains a risk, which is considered by the Fund to be remote in the circumstances, that a

Unitholder could be held personally liable, despite such statement in the Declaration of Trust, for the obligations of the Fund to the extent that claims are not satisfied out of the assets of the Fund. The affairs of the Fund will be conducted to seek to minimize such risk.

RESTRICTIONS ON POTENTIAL GROWTH

The payout by the Data Group of substantially all of its operating cash flow will make additional capital and operating expenditures dependent on increased cash flow or additional financing in the future. Lack of such funds could limit the future growth of the Data Group and the related cash flow to the Fund.

STRUCTURAL SUBORDINATION OF THE UNITS

In the event of a bankruptcy, liquidation or reorganization of the Data Group, holders of certain of their indebtedness and certain trade creditors will generally be entitled to payment of their claims from the assets of the Data Group before any assets are made available for distribution to the Fund. The Units will be effectively subordinated to most of the indebtedness and other liabilities of the Data Group. Except for restrictions under the Data Group's credit facility, the Data Group is not limited in its ability to incur secured or unsecured indebtedness.

DISTRIBUTION OF SECURITIES ON REDEMPTION OR TERMINATION OF THE FUND

It is anticipated that the redemption right will not be the primary mechanism for Unitholders to liquidate their investments. Upon a redemption of Units or termination of the Fund, Trustees may distribute securities of the Data Group directly to the Unitholders, subject to obtaining all required regulatory approvals. There is currently no market for the securities of the Partnership. In addition, securities of the Partnership are not freely tradable and are not currently listed on any stock exchange and no established market is expected to develop in such securities or Notes. Securities of the Partnership so distributed may not be qualified investments for trusts governed by registered retirement savings plans, registered retirement income funds, deferred profit sharing plans and registered education savings plans, depending upon the circumstances at the time.

THE FUND MAY ISSUE ADDITIONAL UNITS DILUTING EXISTING UNITHOLDERS' INTERESTS

The Declaration of Trust authorizes the Fund to issue an unlimited number of Units for such consideration and on such terms and conditions as shall be established by Trustees without the approval of any Unitholders. The Unitholders will have no pre-emptive rights in connection with such further issues. In addition, under the terms of the Convertible Debentures the Fund may be required to issue additional Units in the event that one of more holders of Convertible Debentures elect to convert these securities into Units.

EFFECT OF MARKET INTEREST RATES ON PRICE OF UNITS

One of the factors that may influence the price of the Units in public trading markets will be the annual cash-on-cash return from distributions by the Fund on the Units as compared to cash-on-cash returns on other financial instruments. Thus, an increase in market interest rates will result in higher cash-on-cash returns on other financial instruments, which could adversely affect the market price of the Units.

INVESTMENT ELIGIBILITY AND FOREIGN PROPERTY

There can be no assurance that the Units will continue to be qualified investments for trusts governed by registered retirement savings plans, registered retirement income funds, deferred profit sharing plans and registered education savings plans under the Tax Act. The Tax Act imposes penalties for the acquisition or holding of non-qualified or ineligible investments.

Notes to Consolidated Financial Statements
The Periods Ended June 30, 2007 & 2006
(in thousands of dollars, except per unit amounts, unaudited)

1. THE FUND

The DATA Group Income Fund (the "Fund") is a trust established under the Laws of the province of Ontario pursuant to a Declaration of Trust dated November 15, 2004. The Fund commenced operations on December 21, 2004 and was created to invest in common shares and unsecured subordinated notes of Data Business Forms Limited ("Data Business Forms"). On August 31, 2006, the Fund acquired the business of Relizon Canada Inc.

Management of the Data Group believes that the acquisition of Relizon Canada has introduced a marginal amount of seasonality into the business. The gift card business as well as the buying pattern of a major customer appear to indicate that the fourth quarter may have higher revenues and profit than the other three quarters.

Effective September 30, 2006, the Fund reorganized its structure pursuant to a plan of arrangement to carry on in a limited partnership the business previously carried on by Data Business Forms as a corporation. The reorganization created a flow-through structure under Canadian income tax laws whereby the Fund directly and indirectly owns all of the partnership interests of The Data Group Limited Partnership (the "partnership" or the "Data Group"). The reorganization did not result in a change to the number, type or ownership of the outstanding units of the Fund and had no impact on the daily operations of the Fund. As part of the reorganization, certain consequential amendments were made to the Fund's Declaration of Trust.

The Data Group offers a wide variety of print and electronic products and related services, which include traditional business forms, labels, direct mail products, security documents, commercial print, and facility and print management. The Data Group operates in the following business segments:

- a. DATA East and West - sells a broad range of printed products and document management services directly to customers in the Canadian market. This segment also includes the former business of Relizon Canada Inc.;
- b. Sundog - commercial printing division and total document management and event ticket production; and
- c. Multiple Pakfold - sells forms and labels to independent brokers/resellers in the Canadian market

2. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Fund prepares its financial statements in accordance with Canadian generally accepted accounting principles. The disclosures contained in these unaudited interim consolidated financial statements do not include all requirements of generally accepted accounting principles for annual financial statements and should be read in conjunction with the 2006 audited consolidated financial statements and notes thereto. The accounting policies used in preparing these interim consolidated financial statements are consistent with those followed in the annual 2006 audited consolidated financial statements except as described in note 3 – New Accounting Policies.

3. NEW ACCOUNTING POLICIES

Effective January 1, 2007, the Fund adopted the Canadian Institute of Chartered Accountants Section 3855, Financial Instruments – Recognition and Measurement; Section 3865, Hedges; Section 1530, Comprehensive Income, Section 3861 Financial Instruments – Disclosure and Presentation; and Section 3251, Equity. The adoption of these new standards resulted in changes in accounting for financial instruments, and hedges as well as the recognition of certain transition adjustments have been recorded in opening accumulated other

Notes to Consolidated Financial Statements
The Periods Ended June 30, 2007 & 2006
(in thousands of dollars, except per unit amounts, unaudited)

comprehensive income. These changes were applied retroactively without the restatement of comparative financial statements. The Fund adopted a policy to expense financing costs and therefore, upon adoption of these sections, deferred financing costs of \$2,601, net of related future income taxes of \$289 were charged to opening retained earnings.

FINANCIAL ASSETS AND LIABILITIES

Under Section 3855, financial assets and financial liabilities are initially recognized at fair value and are subsequently accounted for based on their classification as described below. The classification depends on the purpose for which the financial instruments were acquired and their characteristics. Subsequent to the initial recognition, financial instruments are measured at fair value, amortized cost or cost depending on the financial instrument classification.

Held for trading

Financial assets that are purchased and incurred with the intention of generating profits in the near term are classified as held for trading. These instruments are accounted for at fair value with the change in the fair value recognized in net income for the period. The Fund has classified cash and cash equivalents as held for trading. This classification had no impact on the financial statements.

Receivables and payables

Receivables and payables are accounted for at amortized cost. This category includes all trade receivables and payables and had no impact on the financial statements.

Revolving bank facility and convertible debentures

The revolving bank facility and convertible debentures are accounted for at amortized cost using the effective interest rate method. This classification had no impact on the financial statements.

EMBEDDED DERIVATIVES

Derivatives may be embedded in other financial and non-financial instruments. Prior to the adoption of the new standards, embedded derivatives were not accounted for separately from the host contract instrument except in certain circumstances. Under the new standards, embedded derivatives are treated as separate derivatives when their economic characteristics and risks are not clearly and closely related to those of the host instrument, the terms of the embedded derivative are the same as those of a standalone-derivative and the combined contract is not held for trading or designated at fair value. These embedded derivatives are measured at fair value with subsequent changes recognized in the statement of operations as an element of general and administrative expenses. The Fund selected December 21, 2004 as a transition date to recognize as separate assets and liabilities the derivatives embedded in the contracts issued, acquired or substantively modified by the Fund on or after the transition date. The impact of the change in accounting policy related to embedded derivatives had no impact on the financial statements.

HEDGE ACCOUNTING

The Data Group has entered into interest rate swap contracts with its lenders. The interest rate swap contracts meet the criteria for cash flow hedges which under Section 3865 and 3855 are measured at fair value with the unrealized gains and losses on effective hedges recorded in other comprehensive income and the ineffective portion in the net income of the period. Amounts accumulated in other comprehensive income are reclassified to

Notes to Consolidated Financial Statements
The Periods Ended June 30, 2007 & 2006
(in thousands of dollars, except per unit amounts, unaudited)

the consolidated statement of income in the period in which the hedged item affects net income. Upon adoption of the standard, the Data Group recorded an unrealized gain on revaluation of the interest rate swap of \$58. For the quarter ended June 30, 2007, an additional gain of \$622 was recognized. For the six months ended June 30, 2007, an additional gain of \$685 was recognized. The related asset of \$743 is included in prepaid expenses and other current assets for the six months ended June 30, 2007.

COMPREHENSIVE INCOME (LOSS)

Section 1530 establishes standards for reporting and presenting comprehensive income (loss). Comprehensive income (loss) includes net income (loss) and other comprehensive income (loss).

Other comprehensive income (loss) includes changes in the fair market value of derivative instruments designated as cash flow hedges.

4. ACQUISITION OF BUSINESS

ACQUISITION OF RELIZON CANADA INC.

On August 31, 2006, the Fund acquired from The Relizon Company (the "Relizon Canada Acquisition") all of the shares of the Relizon Canada business for cash payment of \$112,000 and 2,964,326 trust units of the Fund, subject to a working capital adjustment. There was an adjustment of \$1,000 to adjust the working capital of Relizon Canada to \$31,300 as of the closing of the Relizon Canada Acquisition which was received by the Fund during the six month period ended June 30, 2007. Immediately following the Relizon Canada Acquisition, Relizon Canada and Data Business Forms Limited were amalgamated and continued as "Data Business Forms Limited" prior to the reorganization of the Fund on September 30, 2006.

The cash payment of \$112,000 was funded with a combination of funds raised pursuant to a public offering of securities of the Fund, additional borrowings under Data Business Form's credit facilities of \$30,000, and cash on hand. In connection with the Relizon Canada Acquisition, the Fund issued to the public (the "Offering") 5,650,000 subscription receipts at a cost of \$9.50 per subscription receipt (the "Subscription Receipts"), each representing the right to receive one unit of the Fund (a "Unit") for no additional consideration upon completion of the Relizon Canada Acquisition, for gross proceeds of approximately \$53,700, and \$35,000 aggregate principal amount of 6.75% extendible convertible unsecured subordinated debentures (the "Convertible Debentures"). Following the closing of the Relizon Canada Acquisition, the Fund issued 5,650,000 Units upon the exchange of the Subscription Receipts. The total net proceeds of the Offering were approximately \$84,000 and were used to fund \$82,000 of the cash portion of the acquisition cost. The remainder of the cash portion of the acquisition cost was funded by the Fund through existing cash balances and committed credit facilities provided by two Canadian chartered banks.

Notes to Consolidated Financial Statements
The Periods Ended June 30, 2007 & 2006
(in thousands of dollars, except per unit amounts, unaudited)

The Relizon Canada Acquisition has been accounted for by the purchase method and results of operations have been included in the statement of income from the date of acquisition. The preliminary purchase price allocation is as follows:

	\$
Cash and cash equivalents	1,888
Accounts receivable	21,220
Inventories (including fair value allocation of \$4,918)	27,550
Prepaid expenses and other assets	3,514
Income taxes recoverable	2,365
Property, plant and equipment	40,092
Goodwill	64,597
Intangible assets	34,123
Accounts payable and accrued liabilities	(29,297)
Restructuring provisions	(10,412)
Unfavourable lease obligation	(1,410)
Pension obligation	(12,266)
Post-employment benefits	(736)
	<u>141,228</u>
	\$
Consideration	
Cash	112,000
Units	27,243
Acquisition costs	2,985
Working capital adjustment	(1,000)
	<u>141,228</u>

The intangible assets acquired are amortized over their expected useful lives of 3-12 years. The goodwill and the intangible assets acquired are not deductible for tax purposes.

Estimated liabilities of \$10,412 have been included in the preliminary purchase price allocation relating to estimated costs associated with severance and exit costs related to acquired facilities. The Fund may also incur costs relating to facilities leased by the Data Group. Any costs relating to the Data Group incurred in connection with the integration of the acquired business will be expensed as incurred as integration costs.

Management is currently completing detailed assessments of the assets acquired and liabilities assumed and expects to finalize the purchase price allocation by August 31, 2007.

Notes to Consolidated Financial Statements
The Periods Ended June 30, 2007 & 2006
(in thousands of dollars, except per unit amounts, unaudited)

5. PENSION OBLIGATION AND EXPENSE

As a result of a significant change in the mix of the investment portfolio within one of the Data Group's defined benefit plans, the Fund has reduced its expected asset return rate effective July 1, 2007 and accordingly, expects to incur additional pension expense of approximately \$0.6 million for the period to December 31, 2007.

The Fund's pension expense related to the defined benefit and defined contribution plans are as follows:

	For the three months ended June 30, 2007	For the three months ended June 30, 2006	For the six months ended June 30, 2007	For the six months ended June 30, 2006
	\$	\$	\$	\$
Defined benefit plan	746	344	1,492	688
Defined contribution plan	117	110	197	222

6. ACCRUED RESTRUCTURING AND INTEGRATION PROVISIONS

In connection with the acquisition of Relizon Canada as described in note 2, the Fund adopted a plan to integrate and restructure the acquired business. As a result, the Fund recognized provisions of \$10,412 for severance and relocation and exit costs relating to certain employees and facilities of the acquired business. The Fund expects that these activities will be completed in 2007. The liabilities relating to these costs have been included in the allocation of the purchase price of the Relizon Canada.

On March 1, 2007, the Fund announced a restructuring plan in connection with the integration of the DBFL and Relizon Canada businesses, which includes a reduction in the Data Group's workforce, the relocation of certain employees to other Data Group facilities and the closure of four plants.

Any costs incurred relating to employees at or facilities previously leased by the Fund are charged to integration costs as incurred in the statement of income.

The following is a summary of the amounts accrued and paid relating to restructuring and integration costs:

For the three months ended June 30, 2007	\$
Accrued restructuring and integration as at March 31, 2007	10,269
Integration costs charged to expense	2,363
Cash payments	(3,167)
Accrued restructuring and integration as at June 30, 2007	9,465

For the six months ended June 30, 2007	\$

7. INCOME TAXES

Income that is currently earned by the Fund that is distributed annually to unit holders is not subject to taxation in the Fund, but is taxed at the individual unit holder level.

On June 22, 2007, legislation (the "SIFT rules") relating to the federal income taxation of publicly-listed or traded trusts (such as income trusts and real estate investment trusts) and partnerships received royal assent. The SIFT rules apply to a publicly-traded trust that is a specified investment flow-through entity (a "SIFT") which existed before November 1, 2006 ("Existing Trust") commencing with taxation years ending in 2011.

Certain distributions attributable to SIFT will not be deductible in computing the SIFT's taxable income, and the SIFT will be subject to tax on such distributions at a rate that is substantially equivalent to the general tax rate applicable to Canadian corporations. Distributions paid by a SIFT as returns of capital will not be subject to this tax. There will be circumstances where an Existing Trust may lose its transitional relief where its equity capital grows beyond certain dollar limits measured by reference to the Existing Trust's marked capitalization at the close of trading on October 31, 2006.

The Fund is a SIFT as defined in the legislation. Accordingly, the Fund will be subject to taxes on distributions of certain income earned from investments in its subsidiaries made after 2010. The Fund is also required to recognize future income tax assets and liabilities with respect to the temporary differences between the carrying amount and the tax bases of its assets and liabilities and those of its subsidiaries that are expected to reverse in or after 2011. The impact of this legislation for this period is a future income tax expense of \$9,746. The Fund expects that its distributions will not be subject to tax prior to 2011 and accordingly has not provided for future income taxes on temporary differences expected to reverse prior to then.

Significant components of the Fund's future tax liabilities and assets with to its investments in partnership and corporate subsidiaries as of June 30, 2007 are as follows:

	June 30, 2007
	\$
<hr/>	
Future income tax assets:	
Pension obligations and post-employment benefits	3,588
Deferred financing	634
Lease obligations	515
Lease escalation	203
Other	85
Total future tax assets	5,025
<hr/>	
Future income tax liabilities:	
Property, plant and equipment greater than tax values	1,920
Intangible assets greater than tax values	12,053
Other	326
Total future tax liabilities	14,299
<hr/>	
Net future income tax liabilities	9,274
<hr/>

(in thousands of dollars, except per unit amounts, unaudited)

8. ASSET HELD FOR SALE

On July 13, 2007, the Fund announced that the Data Group agreed to sell its Brockville, Ontario printing facility for a purchase price of approximately \$4.5 million, subject to customary adjustments. Upon closing of sale and purchase of the facility, the Data Group will lease back the Brockville, Ontario facility. The term of the lease will be 10 years and the Data Group will have the option to renew the lease for an additional term of five years. At June 30, 2007, the carrying value of the Brockville, Ontario facility was \$2,401 and has been reclassified as an asset held for sale. Any gain realized on the sale will be deferred and amortized over the term of the lease.

9. CHANGES IN NON-CASH ITEMS RELATING TO OPERATING ACTIVITIES

	For the three months ended June 30, 2007	For the three months ended June 30, 2006
	\$	\$

Income taxes recoverable	861	66
Accounts payable, accrued liabilities and accrued restructuring and integration provisions	(9,901)	231
	(1,735)	235

10. DILUTED (LOSS) INCOME PER UNIT

Convertible debentures in the amount of \$35,000 were excluded from the computation of diluted earnings per unit as their effect would have been antidilutive. If converted at the beginning of the period, the weighted average number of units outstanding used in computing diluted earnings per unit would have been 3,111,111 units higher.

11. SEGMENTED INFORMATION

The company has three reportable segments organized on the basis of geography, channels and specialties as follows: Data East and West; Sundog; and Multiple Pakfold. These segments follow the same accounting policies as described in the summary of significant accounting policies, and all intersegment revenues are recorded at the exchange amount. Management evaluates the performance of each segment based on earnings before interest and taxes (EBIT). Corporate expenses, interest expense and income taxes are not taken into account in the evaluation of the performance of the business segments. All significant external sales are to customers located in Canada.

	For the three months ended June 30, 2007				
	Data East and West	Sundog	Multiple Pakfold	Intersegment	Total
	\$	\$	\$	\$	\$
